Subject Index

α'-NaV_2O_5 76
AC-conductivity 201
Antiferromagnetic cuprates 60

Bloch oscillations 196
Brillouin spectroscopy 148

Carbon nanotubes 186
$Ce_xLa_{1-x}Ru_2$ 154
Charge carriers 201
Charge-density waves 86, 96, 103, 167
Colossal magnetoresistance 133
Complex conductivity 49
Conductivity 15
$CuGeO_3$ 114

d-wave superconductivity 22, 66
Dielectric constant 167
Dielectric glasses 180
Dielectric permittivity 15
Dielectric relaxation 201

Elastic constants 148
Electron–electron interactions 70
EuB_6 : SmB_6 : Rare-earth hexacarbides 133

Far-infrared spectroscopy 1, 27, 33, 41, 60, 114, 121, 159, 172, 186, 192
FeSi 138
Fermi-surface instability 186
Fullerenes 186, 192

Glass transition 167

Heavy fermions 70, 125
High-temperature superconductors 1, 27, 33, 41, 49, 54, 81
Hopping conductivity 107

Impurity scattering 66
Intermediate valence 148

$K_{0.3}MoO_3$ 70
Kondo insulator 133
Kondo lattice 154

LSCO 15
Line width 192

Magnetic correlations 125
Magnons 60
Millimeter waves 103, 159
Mixed fluoride crystals 159
Mono-silicides 138
Multi-phonons 60
$(NH_4, K)I$ 172

Nonlinear transport 196

Optical properties 1, 27, 86
Organic semiconductor 81
Orientational glass 172

Peierls transition 91
Phase transitions 172
Phason–polariton 86
Phonons 114
Pinned mode 103
Polymer 107

Raman scattering 54
Raman spectroscopy 76, 133, 159, 186
$Rb_{0.3}MoO_3$ 103

SmS 148
Spin-density waves 121, 186
Spin–Peierls transition 76, 114
Strong correlations 9
Submillimeter waves 15, 49, 125
Superconductivity 1, 9, 15, 22, 27, 66
Superlattices 196
Symmetry of the order parameter 54

$(TaSe_4)_2I$ 91, 96
Temperature dependence 192
Thin films 49, 86, 103, 125
Three phonon decay 192
$Tl_2Ba_2CaCu_2O_8$ 27
$Tl_2Ba_2CuO_{6+\delta}$ 54
$(TMTSF)_2PF_6$ 70

UPd_2Al_3 125
UPt_3 70

Vibrational–rotational coupling 192
Vortex state 22, 66

X-ray and neutron scattering 91

$YBa_2Cu_3O_6$ 60

Zn substitution 60
